

MT-AT

ELESA Original design

Crank handles with revolving handle

Material

Glass-fibre reinforced polyamide based (PA) technopolymer. Resistant to solvents, oils, greases and other chemical agents.

Colour

Black, matte finish.

Assembly

H7 reamed black-oxide steel boss.

Revolving handle

Type I.621+x polyamide based (PA) technopolymer, black colour, matte finish, non-dismountable.

Features and applications

The reticular structure of the crank arm and the technopolymer used make this handle very strong and therefore suitable for transmitting high torque values.

Special executions on request (for sufficient quantities)

Threaded brass boss.
